

A Furukawa Company

Your Optical Fiber Solutions Partner®

**Electric Utilities**  
Industrial Networking Solutions  
Easy to Learn, Quick to Connect

**NEW AND IMPROVED! Industrial Cables and Crimp & Cleave Connectors**

[www.ofsoptics.com](http://www.ofsoptics.com)

The GiHCS® industrial cabling solution for your controls applications:

- Substation Automation - Smart Grid
- Substation Security Cameras
- Wind Power
- Solar Farms
- Hydroelectric

OFS supports Industrial Networking Solutions for Electric Utilities with highly reliable, rugged fiber optic cables containing industrial-grade GiHCS\* high-bandwidth multimode optical fiber, plus easy-to-use crimp & cleave LC, SC and ST connectivity. (V-Pin available for 200 µm HCS® step-index only)

OFS optical fiber cabling solution for electrical utilities offers a wide range of advantages, including:

- Immunity to EMI/RFI
- Dielectric properties of fiber optic cables to minimize ground potential
- High bandwidth to support higher data rates over longer distances - Industrial Ethernet
- Field connectorization capabilities designed for electrical technicians with minimal training, quick to terminate and less downtime
- More secure data communications
- Wide operating temperature range

**LC termination in less than one minute!**

**Industrial Networking Solution with Crimp & Cleave Technology**

\* GiHCS provides an industrial-grade solution that is easier to handle and that is more rugged as a result of its 200 µm glass cladding layer and its strength-enhancing 230 µm fluoropolymer hard coating. This is a significantly stronger fiber than common multimode 125 µm glass clad fibers that target enterprise applications.

		LC	SC	ST	V-Pin
Termination Kit	(50/200/230 μm) (62.5/200/230 μm)	DT03732-LC1	DT03732-SC1	DT03732-41	
Termination Kit	(200/230 μm)			DT03732-32	DT03732-16
