InvisiLight[®] Drop Solution

Supporting In-Home Wiring Applications

Features

- Transforms in living unit lengths of OFS EZ-Bend[®] 3.0 and 4.8 mm drop cables and cable assemblies to InvisiLight fiber
- Same components and adhesive as existing InvisiLight ILU Solution
- Same installation tools as existing InvisiLight ILU Solution, plus a cable sheath removal tool
- Compatible with the SlimBox Wall Plate

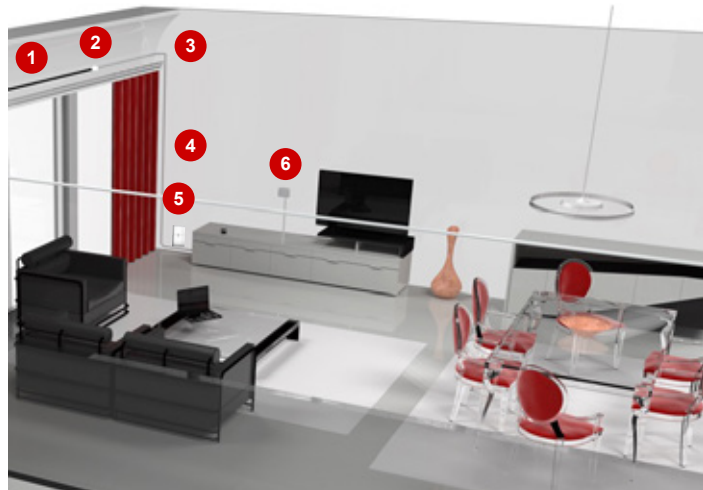

Benefits

- Virtually invisible fiber installation where needed
- Fast fiber routing inside the living unit with few components
- Eliminates connection or splice between drop and ILU fiber
- Compatible with desktop or wall mount ONT installations
- Reliable, proven technology based on the InvisiLight Solution

Product Description

The InvisiLight Drop Solution offers a faster, virtually invisible way to extend OFS EZ-Bend drop cable from outside to inside the living unit. It allows the installer to remove a length of the EZ-Bend drop cable's outer jacket to expose the InvisiLight fiber inside, then use the InvisiLight installation process to affix the fiber to the wall to reach an adapter inside a SlimBox[™] Wall Plate or wall mount ONT. From the SlimBox Wall plate, an EZ-Bend jumper may be used to connect to a desktop ONT. The solution kit features the components and instructions needed to properly route the InvisiLight fiber along and through walls. Sold separately are the application adhesive, adhesive installation tools, and a tool to easily remove the EZ-Bend drop cable's outer jacket.

- 1 Outdoor EZ-Bend drop cable
- 2 Plug and cap between outside and inside home
- 3 Interior and exterior corners for the installation of the InvisiLight fiber
- 4 900µm InvisiLight fiber
- 5 SlimBox Wall plate for connection to the desktop ONT or to the InvisiLight ILU solution
- 6 Optional InvisiLight ILU Module connected to the Wall Plate
