

AccuFlex®+ Ribbon Cable

Compact, Flexible Round Ribbon Cable Offers Increased Durability for High-Bandwidth Applications

Features and Benefits

- Compact, flexible, round ribbon design for ease of deployment
- Offers increased durability and enhanced compression resistance
- Outstanding microbend performance
- Available in plenum-rated designs and dual-rated, non-halogen/LSZH designs
- Ideal for use in high-bandwidth applications and optimized for MPO/MPX connectors
- Complies with Telcordia, ICEA, NEC, ANSI-FDDI, IEEE and TIA standards; meets GR-409 and ICEA pull strength requirements for vertical backbone use
- Meets UL 1666 for riser applications; meets NFPA 262 and UL 910 for plenum use
- RoHS compliant and free of heavy metals
- Available with OFS AllWave® FLEX+ Zero Water Peak (ZWP) Single-Mode Fiber, AllWave® FLEX MAX ZWP Bend-Optimized Single-Mode Fiber, LaserWave® FLEX Multimode Fibers and other multimode fibers

AccuFlex+ Cable Cross-Section

Product Description

The OFS AccuFlex®+ Round Ribbon Cable offers excellent transmission performance, flexibility and connectivity, all in a highly compact package. Available in dual-rated, low-smoke zero halogen (LSZH) and plenum versions, this cable offers increased durability and ease of deployment for a variety of installation environments, including high-bandwidth data center/central office applications and CATV head-ends.

To construct the AccuFlex+ Cable, optical ribbon units are placed in a flame-retardant, central core tube. Each unit features 12 color-coded fibers arranged in a flat ribbon matrix. The solid buffer core is surrounded with a layer of aramid yarn for added protection and strength. Next, two dielectric strength rods are applied linearly over the aramid yarn to provide even greater durability and crush resistance. Finally, the cable construction is completed by the application of a proprietary, flame-retardant jacket.

Why the AccuFlex+ Cable?

The AccuFlex+ Cable is specifically designed for customers who need a round ribbon cable that is smaller, more flexible and easier to install than standard round indoor ribbon cable designs. This cable incorporates aramid yarn and two dielectric strength rods to provide excellent strength and compression resistance.

The AccuFlex+ Cable also offers increased environmental safety for premises use. The Dual-Rated design uses LSZH jacket material and meets both CPR flame ratings and UL1666 OFNR ratings covering multiple global regions. The plenum-rated cables are listed as meeting the flame spread and smoke emission requirements of the NFPA 262 plenum fire test. All cables use advanced materials that allow them to meet fire test requirements in a very compact package.

The cable's outstanding micro-bend performance makes it especially suitable for applications requiring 50 µm multimode fiber such as OFS LaserWave® Fibers. It is also ideal for use in high-bandwidth data center/central office applications, especially where MPO/MPX multifiber connectors are used.
