Features and Benefits

- Offers excellent crush resistance and protection from rodent attacks
- Lightweight, flexible cable is easy to handle and install
- DryBlock water-blocking material for a more craft-friendly, jelly-free cable core, reducing cable preparation and splicing time.
- Easy fiber access with ROL stranding and ripcords
- 600 pound (2700 N) rated pulling tension for long pulls

Product Description

The OFS DryBlock® Light Armor Loose Tube Cable has long been a popular cabling solution for outside plant (OSP) applications, including duct, lashed aerial, and direct buried installations in harsh environments. Corrugated steel armor and a robust polyethylene (PE) jacket combine to deliver rugged durability and added rodent resistance in an RDUP-listed cable that remains lightweight, flexible, and easy to install.

To construct this cable, one to 12 optical fibers are placed within color-coded, gel-filled buffer tubes to protect the fibers from external mechanical and environmental forces and simplify fiber management. The buffer tubes are then stranded around a dielectric central member using the reverse oscillating lay (ROL) stranding method. Unlike other methods, ROL stranding enables quick and easy mid-span entry. DryBlock water-blocking material and dielectric strength elements are then applied to the cable core. Finally, a single layer of electrolytically chrome-coated steel (ECCS) armor and a hefty PE jacket are added to complete the cable construction.

Why the DryBlock Light Armor Cable?

The DryBlock Light Armor Loose Tube Cable offers the “best of both worlds” – excellent compressive strength and rodent resistance in a cable that is lightweight and easy to install.

By featuring DryBlock water-blocking technology, this cable delivers outstanding protection from water penetration while also saving time on cable preparation and splicing. Cables that use DryBlock material require the use of virtually no cleaning solvents during installation, helping to save on cable preparation and deployment time. The craft-friendly, jelly-free core of a DryBlock cable also weighs less and is easier to handle.

The small outer diameter of the DryBlock Light Armor Cable simplifies handling, and ROL stranding of the buffer tubes allows fast mid-span entry.

The DryBlock Light Armor Loose Tube Cable is an excellent choice for duct, lashed aerial, and direct buried installations in challenging environments.
### Specifications

**Fiber Count:**
- 2-60
- 61-72
- 73-96
- 97-120
- 121-144
- 145-216
- 217-240
- 241-288

**Outer Diameter - in. (mm):**
- 0.46 (11.7)
- 0.48 (12.3)
- 0.56 (14.1)
- 0.62 (15.7)
- 0.69 (17.5)
- 0.69 (17.6)
- 0.72 (18.4)
- 0.79 (20.1)

**Weight - lb/kft (kgm/km):**
- 86 (128)
- 99 (147)
- 122 (182)
- 155 (231)
- 186 (277)
- 185 (276)
- 203 (302)
- 241 (359)

### Performance Standard (all cables)

Tested per Applicable Requirements of ANSI/ICEA S-87-640 and Telcordia GR-20 CORE Issue 4.

### Handling

<table>

### DryBlock Light Armor Loose Tube Cable Ordering Information

Example: AT-3BEH2TT-NNN ¹

**Part Number:** AT- S1 S2 SF S3 S4 S5 S6 - NNN

- **S1 = Fiber Selection**
  - See S1 in Fiber Type table above

- **S2 = Fiber Transmission Performance**
  - See S2 in Fiber Type table above

- **SF = Fiber Type²**
  - See SF in Fiber Type table above

- **S3 = Sheath Construction**
  - H = Single Jacket, Single Armor

- **S4 = Tensile Load**
  - 2 = 600 lb. (2700 N)

- **S5 = Core Type**
  - T = 2.5 mm Gel-Filled Buffer Tubes

- **S6 = Fibers per Tube**
  - 2 = 2 fibers
  - 4 = 4 fibers
  - 6 = 6 fibers
  - N = 10 fibers
  - T = 12 fibers

- **NNN = Fiber Count**
  - 002 – 288

¹ Part Number shown is for a DryBlock Light Armor Cable with standard AllWave ZWP attenuation and standard cable print. Maximum AllWave ZWP attenuation: 0.35/0.31/0.27/0.25 dB/km @ 1310/1385/1490/1550/1625 nm

² Contact OFS Order Management for information on other cable variations, including additional fiber types, attenuation, and custom cable print.

**NOTE:** For more information regarding typical attenuation as well as attenuation parameters on Link Design Value (LDV) (Maximum end-to-end attenuation over a concatenated span), please see OFS Application Note AN-111 which can be downloaded at www.ofsoptics.com or contact your OFS representative.
