# SlimBox™ Customer Splice Point CSP Module

Internal and External Units Support Multiple Dwelling Unit (MDU) and In-Home Wiring Applications

## Features

- Small and inconspicuous footprint
- Common installation methods and procedures for both indoor and outdoor units
- Versions as small as 6.5" (164.41 mm) length x 3.9" (99.1 mm) height x 1.23" (31.35 mm) depth
- Large space for slack storage
- Available in white (indoor) and gray (outdoor). The outdoor version features a sealed cover.
- Accommodates most common fiber optic drop cable sizes including 900  $\mu\text{m}$ , 3.0 mm, 4.8 mm, and flat drop cables

Internal SlimBox CSP Module

## Product Description

The SlimBox CSP Module can be used for a wide variety of applications including Fiber-to-the-Home (FTTH) and Fiber-to-the-Business (FTTB) deployments.

When used in conjunction with indoor Optical Network Terminals (ONT) and the wall-hugging capabilities of OFS EZ-Bend® Optical Cable, the SlimBox CSP Module enables the network operator to provide a very clean, professional installation at an attractive price point.

The SlimBox CSP Module can also be used as a simple, low-priced fiber distribution box for apartments or businesses for Multiple Dwelling Unit (MDU) or retail shopping plaza applications.

A separate splice tray holds up to four splice sleeves (40 mm sleeves only), and both versions accommodate up to four SC-APC connectors.

Installed External CSP Module
