Fiber Optic Mini Fanouts

Quickly and Easily Facilitates the Transition of Cable Ribbon

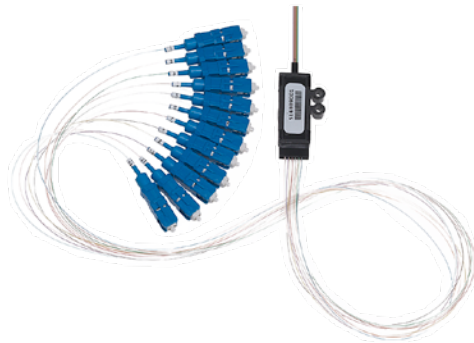

The LC Mini Fanout

Features

- Factory connectorized, pre-tested, and ready to use
- No need for special tools and associated apparatus
- Can be deployed immediately.

Benefits

- Provides our customers with application flexibility
- Saves time and money since only one splice is required for twelve connections
- Utilizes high quality connectors and terminations.

The SC Mini Fanout

Product Description

Fanouts are used provide a fast and easy transition from single-mode or multimode cable ribbon to twelve individual fiber connection ports.

Mini fanouts consist of a 72 inch (182.8 cm) long ribbon, a transition assembly, and 12 individual fibers attached to a variety of fiber optic cable connectors in either 24 or 48 inch (61 or 121.9 cm) lengths. Used in fiber distribution shelves and interconnect units, the individual fibers of this fanout are strengthened with a special buffer for added protection.

Mini fanouts eliminate tedious individual fiber splicing and connectorization. The need for special tools and associated apparatus, and the need for testing at distribution points is also reduced - saving time and money.

Applications

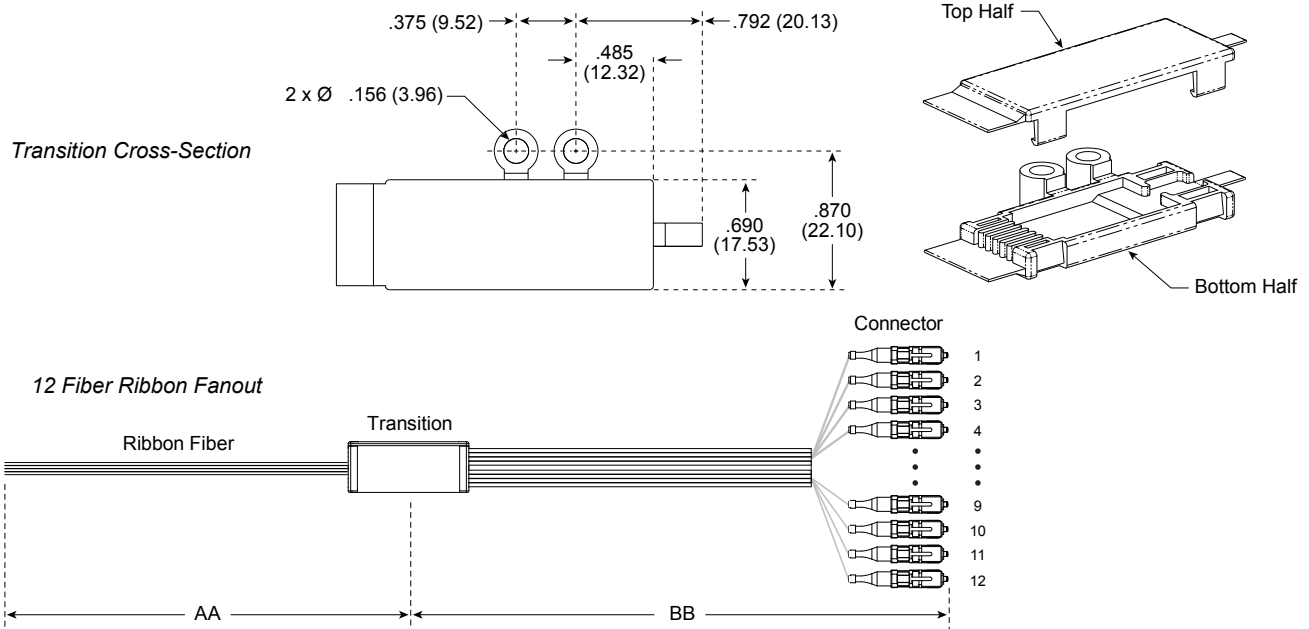

Mini fanouts provide an easy transition from single-mode or multimode cable ribbon to twelve individual fiber connection ports in:

- Central offices
- Private network distribution
- Local area networks.
