

## In-Living Unit (ILU) Wall Plate

With shuttered SCA adapter

### Features and Benefits

- Allows termination of an optical cable or jumper using direct connectorization or splicing (fusion or mechanical) to optical extensions (pigtailed) of two optical fibers
- Accommodates one internal optical adapters (SCA shuttered adapter footprint)
- Compatible with wall electrical boxes
- Compact dimensions
- Discreet appearance
- Hidden frontal screw for fast and secure cover attachment to the base
- Internal fiber guides for easy installation
- Can be installed in any vertical plane surface
- Plastic body for high mechanical resistance and efficient design

### Product Description

The In-Living Unit (ILU) Wall Plate with shuttered adapter serves as a termination point or a demarcation point for optical fiber in an indoor environment. An EZ-Bend® jumper with shuttered connector would connect the SlimBox Wall Plate to a desktop ONT, and the InvisiLight® ILU solution may be used in case of a distant ONT.

**NOTE:** For brownfield applications, InvisiLight fiber can be brought into the wall-plate from the bottom or top. The cable to the semi-finish wallplate will be nearly invisible within the ILU.

Product Characteristics

Capacity	1 SCA shuttered adapter
Accessories	Screws and anchors
Application	Internal Use

Physical Characteristics

Dimensions	4.5" H x 3.2" W x 0.6" D
Material	PP Plastics, UL94V-0
Color	White (RAL 9016)
Standard	EIA/TIA-568.B, ISO 11469, RoHS
